C.S.AMIRDASELVI

Mobile: 8122012154 **Email:** csamirda@gmail.com | LinkedIn: C.S.Amirdaselvi

I am a 3rd-year CSE student, Tech enthusiast with a passion for innovation and problem-solving Passionate Big Data enthusiast with a knack for extracting insights from large datasets. Continuously exploring data-driven technologies, leveraging statistical techniques, and building innovative solutions to solve real-world problem

EDUCATION

SRM Institute of Science and Technology **Jul 2023 – Apr 2027 (Expected)**
Bachelor of Technology in CSE with BIG DATA ANALYTICS **CGPA: 9.79/10.0**

SKILLS

Programming languages: Python,C,C++
Databases: MySQL
Web Development: HTML, CSS, JavaScript, BootStrap
Design Tool: Figma
Data Visualization & BI Tools: Power BI, MS Excel
Machine Learning & EDA: Data Preprocessing, Data Visualization, Model Building

WORK EXPERIENCE

House Price Prediction System (Individual Project) **Jun2025-Aug2025**

- Developed a House Price Prediction model using regression techniques to estimate property values based on multiple features.
- Designed and deployed a user-friendly website to make the prediction system accessible, integrating the ML model into a web interface using

Machine Learning Intern - Izeon Innovative IT training Company **Aug2025-Sep2025**

- Gained hands-on experience in Machine learning and deep learning
- Collaborated with mentors and team members to apply ML solutions in real-time case studies and projects.

Music genre Classification System (Individual Project) **Aug2025-Sep2025**

- Built a Music Genre Classification system using Deep Learning techniques to classify audio tracks into different genres.
- Deployed the trained model on a user-friendly Streamlit web, enabling users to upload audio files and receive instant genre classification result.

Web development Intern - Izeon Innovative IT training Company **Dec 2024 – Jan 2025**

- Gained hands-on experience in frontend development.
- Completed responsive web development tasks and contributed to live projects

Tourify – Travel & Tourism Website (Individual Project) **Jan2025**

- Designed and developed Tourify, a responsive travel and tourism website to enhance user experience in trip planning.
- Built front-end interfaces using HTML, CSS, JavaScript, ensuring cross-browser compatibility and mobile responsiveness.

Electric Vehicle Market Analysis (Team Project) **Nov 2024-Dec 2025**

- Analyzed electric vehicle market trends using Python, leveraging data visualization libraries (Matplotlib, Seaborn) to uncover insights on growth, demand, and regional adoption.
- Applied basic machine learning models to predict future EV market size and sales trends, supporting data-driven decision-making.

Crop disease prediction, Smart India Hackathon (Team Project) **Sep 2024 – Nov 2024**

- Team Member, Leading the team AgriVation Squad by giving technical solutions to selected problem statements under different themes.

Department Store Management System, SRM (Individual Project) **Feb 2024- Mar 2024**

- Developed a Department Store Management System using Python, MySQL, and Tkinter to manage inventory, billing, and customer records through a user-friendly GUI.
- Integrated MySQL backend with Python to enable real-time product updates, transaction logging, and data persistence for efficient store operations.

CERTIFICATIONS

- 'Python Data visualisation' by Udemy
- 'Datatrix student Volunteer' by SRM
- 'Craptophia participation UI/UX design'by SRM
- 'Adobe India Hackathon participation'by Adobe
- 'Data Science and Analytics'by Course Central
- 'Community Connect'by LEO CLUB
